Re: Invitation letter mobility stay Ms. Nayanika Sekhar Das

dear Ms. Nayanika Sekhar Das,

It is with pleasure that I confirm my invitation to you to join our lab for an Erasmus+ mobility stay from October 1st-October 31st 2025, for research on a project on "computational and experimental alanine scanning". This invitation is provisional on you being able to support yourself (cost of living, travel) through an Erasmus+ fellowship. I guarantee access to all research facilities in our institute during this mobility stay.

Sincerely

Prof. Dr. Gerard Roelfes
Chair of Biomolecular Chemistry & Catalysis
Scientific director Stratingh Institute for Chemistry, University of Groningen.
